## 22 Anti-theft alarm system - general information

### **Caution:**

These vehicles are equipped with the Central Body Electronic (ZKE-V) system. Each individual system is linked to a centralized control module that allows efficient and accurate troubleshooting. This control module governs the windshield wipers and washers, the central locking and anti-theft system, the power windows, the interior lights, the alarm system and the electronic consumer sleep mode. In the event of a malfunction with this system, have the vehicle diagnosed by a dealer service department or other qualified automotive repair facility, as special test equipment is required.

These models are equipped with a sophisticated anti-theft alarm and immobilizer system. Should a fault develop, the system's self-diagnosis facility should be interrogated using dedicated test equipment. Consult your BMW dealer or other qualified automotive repair facility.
