BMW 3-Series (92-98) & Z3 (96-98) Haynes Online Manual

31 Clutch check

This check is specified by BMW to check the clutch friction disc for wear. The check involves the use of a special tool, which fits into the clutch slave cylinder aperture in the transmission bellhousing, once the slave cylinder has been unbolted.

It is unlikely that the clutch wear will be significant unless the vehicle has covered a high mileage, or the clutch has been abused.

If in doubt as to the condition of the clutch friction disc, have the check carried out by a BMW dealer.
