

Buying parts

Replacement parts are available from many sources. Our advice concerning them is as follows:

Retail auto parts stores

Good auto parts stores will stock frequently needed components which wear out relatively fast, such as clutch components, exhaust systems, brake parts, tune-up parts, etc. These stores often supply new or reconditioned parts on an exchange basis, which can save a considerable amount of money. Discount auto parts stores are often very good places to buy materials and parts needed for general vehicle maintenance such as oil, grease, filters, spark plugs, belts, touch-up paint, bulbs, etc. They also usually sell tools and general accessories, have convenient hours, charge lower prices and can give you knowledgeable answers to your questions. To be sure of obtaining the correct parts, have engine and chassis numbers available and, if possible, take the old parts along for positive identification.

Authorized dealer parts department

This is the best source for parts which are unique to the vehicle and not generally available elsewhere. Prices for most parts tend to be higher than at retail auto parts stores.

Auto recyclers or salvage yards

Auto recyclers and salvage yards are good sources for components that are specific to the vehicle and not subject to wear, such as fenders, bumpers, trim pieces, etc. You can expect substantial savings by going this route, and self-service salvage yards offer still more savings if you're willing to bring your own tools and pull the part(s) yourself.

Warranty information

If the vehicle is still covered under warranty, be sure that any replacement parts purchased - regardless of the source - do not invalidate the warranty! In most cases, replacement parts, even from aftermarket suppliers, are designed to meet manufacturer specifications. If in doubt, check with the parts supplier.

Because of a Federally mandated extended warranty that covers the emissions control system components, check with your dealer about warranty coverage before working on any emissions-related systems.

Discount auto parts stores provide a wide variety of parts, and the knowledgeable counter-people found there are an excellent resource

You'll find the details of your vehicle's warranty coverage in the warranty book provided by the manufacturer
