Run-flat tires

All models covered by this manual are equipped with Run-flat tires. In the event of a puncture, the structure and construction of the tire allows the vehicle to be driven deflated at a maximum speed of 50 mph.

The maximum distance to be covered with a deflated tire is:

- A. Low load (1 to 2 people without luggage) - 150 miles
- B. Moderate load (2 people with luggage, 4 people without luggage) - 90 miles
- C. Full load (4 or more people with luggage) - 30 miles

Because Run-flat tires are standard equipment, no spare wheel or vehicle jack is provided.
