

## 6 Automatic transmission overhaul - general information

In the event of a fault occurring with the transmission, it is first necessary to determine whether it is of an electrical, mechanical or hydraulic nature, and to do this special test equipment is required. It is therefore essential to have the work carried out by a BMW dealer if a transmission fault is suspected.

Do not remove the transmission from the vehicle for possible repair before professional fault diagnosis has been carried out, since most tests require the transmission to be in the vehicle.
