BMW 3-Series and Z4 (99-05) Includes 2006 325ci/330ci Coupe and Convertible models Haynes Online Manual.

8 Headlight beam alignment - general information

1 Accurate adjustment of the headlight beam is only possible using optical beam setting equipment and this work should therefore be carried out by a BMW dealer or qualified repair shop.

2 For reference, the headlights can be adjusted by rotating the adjuster screws on the top of the headlight unit (see illustration) . The outer adjuster alters the horizontal position of the beam while the center adjuster alters the vertical aim of the beam.

8.2 Headlight beam adjustment screws

3 Some models have an electrically-operated headlight beam adjustment system which is controlled through the switch in the dash. On these models ensure that the switch is set to the off position before adjusting the headlight aim.
