## 16 Windshield/headlight washer system(s) check

### Note:

Not all models are equipped with a headlight washer system.

1 Check that each of the washer jet nozzles are clear and that each nozzle provides a strong jet of washer fluid. The jets should be aimed to spray at a point slightly above the center of the windshield/headlight. On the windshield washer nozzles where there are two jets, aim one of the jets slightly above then center of the screen and aim the other just below to ensure complete coverage of the screen. If necessary, adjust the jets using a pin or length of fine, stiff wire (see illustration) . Take great care not to damage the water channels in the jets.

**16.1 Use a fine pin to adjust the washer jet aim**

2 Adjustment of the headlight washer jets requires the use of BMW special tool 00 9 100.
